BORA Pure

BORA Pure highlights

Minimalist design

The cooktop and extractor are ideal for flush installation. Their perfect lines allow them to blend in discreetly and elegantly with any modern kitchen design.

Integrated drip tray

If anything is spilt during cooking, the integrated drip tray safely catches both solids and liquids.

Simple cleaning

All parts that come into contact with cooking vapours can be easily removed through the inlet opening and put in your dishwasher for fuss-free cleaning.

Minimum volume

Thanks to the quiet fan, the extractor remains barely audible even at high power levels.

Intuitive sControl operating panel

All of the slider's functions are at your fingertips by simply swiping up or down or tapping the surface directly with your finger.

BORA Pure highlights

Compact size

Due to its compact dimensions, the system fits into almost any kitchen, even small ones, and creates room for additional wall units by eliminating the extractor hood.

Oversized 4 24 cooking surface

Thanks to the central operating panel by the extractor, no space is taken up by controls on the cooktop and there is room to cook with 4 pots measuring up to 24 cm at the same time.

eSwap

In recirculation mode, odours are neutralised by an activated charcoal filter. You can change the filter through the air inlet aperture.

Maximum storage space

At under 200 mm, the low installation height gives you maximum storage space for pots and other kitchen utensils in the cupboard below.

Automatic extractor control

The extractor power level automatically adjusts itself according to current cooking conditions, so there's no need for manual adjustment.

A trademark of your kitchen.

Effective vapour extraction. A compact system like no other: minimalist, flush-mounted, highly elegant, extremely quiet and endlessly intuitive. That's the new BORA Pure with innovative sControl touch controls and a choice of coloured air inlet nozzles.

Practical down to the last detail

Fine technical details that make all the difference: our unique eSwap system allows you to change the filter from the top through the air inlet aperture – without having to remove drawers or plinth panels.

Experience BORA live
