BORA S Pure

# BORA S Pure highlights

## **Minimalist design**

Thanks to the flush-integrated cooktop and extractor as well as the minimalist design, the BORA S Pure integrates seamlessly into any contemporary kitchen.

## **Intuitive sControl operating panel**

The unique vertical slider makes operating the cooktop easier than ever by intuitively swiping your finger up or down or directly tapping the controls. All important functions are instantly at your fingertips.

## **Minimum volume**

Always markedly quiet – even at high power levels: thanks to the optimum airflow and the use of an extremely quiet fan. There are no distractions when cooking and no interruptions when entertaining.

## **Integrated drip tray**

If anything is spilt during cooking, the integrated drip tray safely catches both solids and liquids.

## **eSwap – easy filter change**

In recirculation mode, odours are neutralised by a highly efficient activated charcoal filter. To make changing the filter easier, it can be accessed from the top through the air inlet opening, without removing drawers or plinth panels.

## **Ultra-compact design**

The solution to all space issues: with its extremely compact dimensions, the BORA S Pure cooktop is the perfect choice for even the smallest of kitchens. It even fits in kitchen units with a width of just 60 cm. This opens up a whole new range of kitchen design options!

## **Simple cleaning**

All parts that come into contact with cooking vapours can be easily removed through the wide and easily accessible air inlet opening. They can then be cleaned in the dishwasher, where they take up very little space.

## **Optimum cooktop use**

The BORA S Pure has four cooking zones of different sizes, suitable for accommodating pots and pans with all conventional dimensions. Two of the four induction coils have been specially developed for the BORA S Pure. This enables optimum use of the entire cooktop surface. Users can easily cook with up to four pots and pans of conventional sizes at the same time, no matter how large or small.

## **Maximum storage space**

At under 200 mm, the low installation height and integrated recirculation unit guarantee maximum storage space for pots, pans and other kitchen utensils in the cupboard below. Even in 60-cm-deep kitchen units, no drawers need to be shortened in recirculation mode. A change from the norm.

## **Automatic extractor control**

The extractor power level automatically adjusts itself to the cooktop usage. There is no need for constant manual adjustment, so users can fully focus on cooking.

# A surprising number of options.

With its compact dimensions, the BORA S Pure cooktop fits into even the smallest of kitchens, solving all of your space dilemmas. The BORA S Pure's integrated and automatically controlled extractor fully draws away vapours and odours while cooking. The unique asymmetric arrangement of the extractor opening makes it possible to cook on four cooking zones of different sizes. With this extraordinary and modern appearance, the BORA S Pure further refines any kitchen design. The touch slider makes all operating functions easily accessible at the touch of a finger – and with its quiet fan, the extractor is barely audible even on high power.

# BORA S Pure Coffee function

The coffee function on the BORA S Pure's two left cooktops makes brewing coffee incredibly simple. All you need is an induction-compatible espresso pot with a diameter of at least 7 cm. Once set to your espresso pot's water capacity, the cooktop heats up automatically and switches off after the required time. The remaining time on the coffee function can be checked by tapping the multi-function display. The result: your morning coffee is freshly prepared for you while you get on with starting your day.

# Practical down to the last detail

Fine technical details that make all the difference: our unique eSwap system allows you to change the filter from the top through the air inlet aperture – without having to remove drawers or plinth panels.
